

**GreenMark to Present at the 37th Annual Michigan Growth Capital Symposium
and Coulter Investment Forum May 15-16**

Ann Arbor, MI – May 14, 2018 – GreenMark Biomedical Inc. today announced that it has been selected to present at the 37th annual [Michigan Growth Capital Symposium](#) (MGCS). GreenMark, a Delaware corporation with facilities in Michigan will be presenting to investors in attendance, including more than 100 top venture capital firms.

GreenMark is developing next generation diagnostics and therapeutics for early stages of Dental Caries (tooth decay), the world's most prevalent chronic disease. The company's diagnostic is to be used by dental professionals as part of the routine dental exam, to better detect, predict progression and monitor treatment of Dental Caries. The product, a mouth rinse containing fluorescent particles made from food grade corn starch, targets active cavities and illuminates them using a standard dental curing lamp found in every dental practice. At early stages before they cavitate, non-surgical management options can be used for Dental Caries, resulting in improved long term oral health outcomes for patients.

The company's founder, Dr. Steven Bloembergen, has experience and business success with starch nanoparticle technology as co-founder of EcoSynthetix Inc. (TSX: ECO), a company with global sales and production. GreenMark was spun out in 2016 to develop minimally invasive dental and medical applications. *"We were recently awarded a Phase I SBIR by the National Institutes of Health, a strong endorsement of our technology, and we are in the midst of closing a priced \$500K to \$1MM Seed round, with \$500K committed and first funds received as part of a rolling close,"* states Bloembergen. He will be presenting at MGCS on Wednesday May 16 in the 10:20-11:20 a.m. session as part of the Medical Device/Healthcare IT/Tech track.

First held in 1981, MGCS is the premier, must-attend event for venture capitalists, technology transfer professionals, founders, CEOs and the best of the Midwest early stage and emerging, high-growth companies that are seeking institutional investment. The two-day conference will feature a keynote address from Wendell Brooks, Senior VP of Intel Corporation and President of Intel Capital, as well as engaging industry panel discussions and networking opportunities for attendees.

More than 400 entrepreneurs, researchers, investment professionals and business executives are expected to attend the Symposium, which will be held May 15-16 at the Marriott Resort in Ypsilanti, MI. *"For nearly four decades, the Symposium has played an essential role in connecting the best and the brightest Midwest entrepreneurs with the investors they need to access new sources of funding to bring their businesses to the next level,"* said David Brophy, Michigan Growth Capital Symposium founder and director of the University of Michigan's Center for Venture Capital & Private Equity. *"Once again, I am impressed by the caliber of companies that will be presenting at this year's event, and we are glad to have GreenMark Biomedical join the ranks."*

About GreenMark Biomedical Inc.

GreenMark's central concept is biodelivery of health solutions on target, precisely where needed. The company has patented, patent-pending and proprietary technologies that use different grades of biobased nanoparticles uniquely modified into novel products that have built-in targeting performance for diagnostic & therapeutic dental and medical applications.

GreenMark Biomedical Inc., 325 E. Grand River Avenue, Suite 314, East Lansing, MI 48823-4375. Contact: info@greenmark.bio or (517) 896-3665.

About the Michigan Growth Capital Symposium

The Michigan Growth Capital Symposium (MGCS) is the original university-based venture investment fair, which was first held in 1981. This decades-old nationally attended event is the largest Midwest fair of its kind that brings together venture capital investors, business angels, start-up companies, university tech transfer officers and research faculty. MGCS provides an opportunity for participants from the venture capital community to connect with Midwest start-ups seeking funding and to learn about emerging innovations that span tech and the life sciences. MGCS is presented by the Center for Venture Capital & Private Equity Finance and the Zell Lurie Institute at the University of Michigan Ross School of Business, with support from the Michigan Venture Capital Association.
